

# Engineer It!

## Exploring Ancient Technologies

*Build a shelter, design a boat, weave a shoe, or invent a fishing tool! Native American people have always used science and engineering to create effective tools, homes, clothing, cooking methods and more - passing this knowledge down through generations. Many of these innovations are still being used today. Try out your own engineering skills while discovering technologies designed by Oregon's first engineers.*

July 25<sup>th</sup> @ 1:00pm  
Gilliam County Library

*Presented by the University of Oregon's Museum of Natural and Cultural History*
